A 4x4 grid puzzle with numbered cells and shaded regions. The grid contains the following values:

4	6	4	9
1	1	1	1
1	1	1	1

The grid is divided into four 2x2 subgrids by dashed lines. The top-left subgrid contains the value 4. The bottom-left subgrid contains the value 1. The other two subgrids are empty.

A 4x4 grid puzzle. The top row contains two shaded cells in the first and second columns. The second row contains three numbered cells: 5 in the first column, 3 in the second, and 4 in the third. The third row contains three shaded cells in the first, second, and fourth columns. The bottom row contains four shaded cells in the first, second, third, and fourth columns.

A 4x3 grid of 12 numbered cells (7, 7, 2, 9) enclosed in a dashed box.

A 4x4 grid puzzle with numbered cells and shaded regions. The grid contains the following values:

7	8	3	5

The grid is divided into several shaded regions by dashed lines. A large L-shaped region covers the top-left three rows and the first two columns. A smaller L-shaped region is located in the bottom-right corner. There are also several single-cell shaded regions.

A 4x4 grid puzzle with numbered cells and shaded regions. The grid contains the following values:

6	8	2	1
3	3	3	3
3	3	3	3

The grid is divided into several shaded regions by dashed lines. A large L-shaped region covers the top-left three columns and the first two rows. A smaller L-shaped region is located in the bottom-right corner. There are also several smaller rectangular and square shaded areas.
