■ 次の台形の面積を求めましょう。

$$(3+7) \times 4 \div 2 = 20$$

$$20\text{cm}^2$$

$$(2+5) \times 5 \div 2 = 17.5$$

$$17.5\text{cm}^2$$

$$(8+12) \times 6 \div 2 = 60$$

$$60\text{cm}^2$$

$$(4+5) \times 5 \div 2 = 22.5$$

$$22.5\text{cm}^2$$

$$(4+7) \times 3 \div 2 = 16.5$$

$$16.5\text{cm}^2$$

$$(6+8) \times 8 \div 2 = 56$$

$$56\text{cm}^2$$

$$(5+14) \times 10 \div 2 = 95$$

$$95\text{cm}^2$$

$$(3+14) \times 7 \div 2 = 70$$

$$70\text{cm}^2$$

$$(7+12) \times 9 \div 2 = 85.5$$

$$85.5\text{cm}^2$$

$$(15+18) \times 12 \div 2 = 198$$

$$198\text{cm}^2$$

$$(12+15) \times 18 \div 2 = 243$$

$$243\text{cm}^2$$

$$(14+28) \times 24 \div 2 = 504$$

$$504\text{cm}^2$$
