The puzzle consists of 10 arithmetic problems arranged in a grid. Each problem is a cross-shaped arrangement of boxes. Some boxes contain numbers, some contain symbols like '+', '=', and '||', and some are empty. The goal is to fill the empty boxes with the correct numbers.

Problem 1 (top-left):
Top: []
Top-Right: +
Left: 1 + [] = 3
Center: + [] ||
Bottom-Left: [] + [] = 13
Bottom: ||
Bottom-Right: 9

Problem 2 (top-right):
Top: 1
Top-Right: +
Left: [] + [] = 3
Center: + [] ||
Bottom-Left: [] + [] = 7
Bottom: ||
Bottom-Right: 5

Problem 3 (middle):
Top: 2
Top-Right: +
Left: 1 + [] = []
Center: + [] ||
Bottom-Left: 7 + [] = 16
Bottom: ||
Bottom-Right: []

Problem 4 (bottom-left):
Top: []
Top-Right: +
Left: 4 + 3 = []
Center: + [] ||
Bottom-Left: [] + [] = 16
Bottom: ||
Bottom-Right: ||

Problem 5 (bottom-right):
Top: 2
Top-Right: +
Left: 2 + [] = []
Center: + [] ||
Bottom-Left: [] + 5 = 8
Bottom: ||
Bottom-Right: []

■ あいているますに 正しい かずを いれましょう。

The puzzle consists of several arithmetic problems arranged in a grid. Some numbers are in red, and some cells are blacked out. The problems are:

- Top-left: $1 + 2 = 3$ (2 is red). Below it: $7 + 6 = 13$ (7 and 6 are red). To the right: $3 + 6 = 9$ (3 is red).
- Top-right: $1 + 2 = 3$ (1 and 2 are red). Below it: $3 + 4 = 7$ (3 and 4 are red). To the right: $2 + 5 = 7$ (2 is red).
- Middle: $1 + 6 = 7$ (6 and 7 are red). Below it: $7 + 9 = 16$ (9 is red). To the right: 13 (13 is red).
- Bottom-left: $4 + 3 = 7$ (7 is red). Below it: $8 + 8 = 16$ (8 and 8 are red). To the right: 11 (11 is red).
- Bottom-right: $2 + 1 = 3$ (1 and 3 are red). Below it: $3 + 5 = 8$ (3 and 5 are red). To the right: 4 (4 is red).
